

SPEECH BY HON. P. MOONGO DTA OF NAMIBIA ON:

NATIONAL BUDGET 2012/2013

Mr Speaker honourable members. The 2012 /2013 Budget is another hopeless empty blow attempt promise for more jobs and economic growth in Namibia. Because unemployment is at alarming rate, strikes of workers in government and in many companies are reasonable devastating the Namibian economy.

Mr Speaker honourable members, allow me to give a practical marshall plan, on how Tipeeg should be carried out. The amount of 14.7 billion must start projects right in the Namibian communities, such as woman & man organisations, vulnerable & disabled organisations, street kids, bush mechanics, venders and taxi organisations. These people are affected by unemployment, hunger & extreme poverty. They must get trained in their different economical fields and get skilled. Identify their projects and carry them out responsibly. Project directors and management committees must use their talents and the skills they gained from trainings so that the projects can succeed efficient, accurate and effectively.

Mr Speaker honourable members, the government must address the crisis of the flood. We cannot talk economic growth, if we did not address the flood which devastate and destroy the economy of Namibia. The government must implement the Marshall plan how to divert the water from the community. It took now five years without start. How can we talk about job creation and economic growth if the government failed to solve the flood distraction, now you talk about TIPEEG will do best, how ? That is a day dream, Comrades!

Some

The Swapo members in parliament are here to defuse, defend and cool down the tension of unfair, un equal distribution of resources and then suppress the opposition motion not to be implemented. They make cocus in parliament to silence those who introduce progressive issues affecting the Namibian Nation. That deadly action must stop now, because they misuse the 2/3 third majority.

I appeal to the Nation to stand firm and fight against poverty corruption and unequal distribution of wealth. *and stop wanting ab them in into poverty*

Mr. Speaker honourable members. In my previous speech of the budget, I talked about shades at every road block in Namibia as a whole to protect police officer from the burning sun and chill wind and to provide toilet facilities. I therefore request the Ministry to allocate funds and provide shades.

In call, upon the government institute, private companies and shebeen banks to see to it. That their customers are served with public toilets. And are allowed to use Toilet facilities at their premises. Stop discrimination.

Mr. Speaker there are urgent call to the Ministry of Health and Ministry of Environment, that there is a deadly big

mosquitos in the Oshikoto region which are killing goats, pigs, chickens and even babies. I request the two Ministry to allocate funds and take action by spraying the mosquitos and the legs before the bleeding time.

Mr. Speaker the Health Ministry has a persistant problem of lower salaries. This demand lasted for 2010-2011. Why the Ministry using delaying tactics from 2010-2011, while the Namibian money is being corrupted in huge amounts, not in thousand but in hundred millions ?

Whether the Ministry is ready to give special adjustment but not annual increasement. To pay our health workers include, doctors who are serving our critical sick patients in the hospitals. Does the current budgets include the special payment for our health workers ?

I call upon the Ministry to increase the ^{security guards} ~~guards~~ at the hospitals because theft is alarming within the hospital yard & steal the vehicles of patients and health workers. They broke into the vehicles to steal valuable properties such as radios and vehicle tyres.

Let the government to employ foreign specialist Doctors and provide more special funds to buy health facilities and machines such as, CT-SKAN, radiation altemo therapy to render health service at the regional hospital in order to prevent thousands of referral patients from their regional hospitals. In order to prevent floppy, overcrowded and long queues of patients at the head quarter intermediate hospital in Windhoek.
