NOTICE OF A MOTION:

Hon. McHenry Venaani:

That this Assembly –

Discuss the most recent census which indicates that we have 464 839 households, of which 6% are headed by single persons. Typically, we understand a great proportion of these households to be headed by women, with same census report citing that 43.8% of Namibian households are female headed. This supported by trends which indicate that women are generally more likely than their male counterparts to parent and raise their children.

According to a report of the Office of the Judiciary, by 2018 we had 31 104 active maintenance of which 15 097 were default cases. We are also aware that a great proportion of single parents opt not to pursue child maintenance orders. This indicates a skewed socio-economic burden placed on women in caring for children and families. Single parent households generally have lower incomes and are more vulnerable to food insecurity.

I thus further move that this house explore possible remedies such as subsidized utilities and public transport in order to create better safety nets for single mothers, and alleviate some of the disproportionate socio-economic burden placed on them.

Further, that this motion be referred to the relevant Standing Committee.
