- Ensure that the biometric system hardware and software is fully functional throughout the contract period assist in producing required system reports;
- To provide a response to all complaints/enquiries on time;
- The service provider shall be responsible for detection of faulty or inaccessible devices. Provide a resolution of biometric equipment faults within two (2) business/working days;
- Ensure that all licenses are in place and up to date (provide an annual recurring license for the duration of the contract);
- Ensure that the biometric system is fully functional, updated and/or patched in accordance with original software manufacturers guideline.
- Responsible for maintenance of the cable connecting the reader to the network switch;

- Ensure that the network point is in a good working condition for the reader to function;
- Provide support, repair and maintenance (proactive and/or reactive) services;
- Conduct preventative maintenance on system hardware;
- Check door closures against leakages and loose connection and replace where necessary;
- Check and advice on door speed open/close mechanism (functionality of door hinges, locks, handles etc.);
- Check securing of fixings and fastenings tighten/adjust as necessary;
- Measure and record access control equipment performance parameters (voltages, power, current etc. for readers, controllers, powers supplies/UPS.
- Check network/communication with readers, servers and other related devices and check network connection between door controllers;
- Check cable protection ducts, conduits, mini-trucking etc. to ensure proper physical conditions;
- Check all connections, plugs for damage continuity, moisture ingress.
- Check that all functions operate correctly (storage/database, time, events logs, voltages, resolution, software, drives, streaming, network, database, etc.
- Check connections and quality signal level/connection.
- Check all input and output parameters;
- Check operation of fuses and circuit breakers and ensure that there is power supply to the system;
- Make visits monthly or quarterly for operating system maintenance;
- Repair or replace damaged system components if necessary;
- Conduct system performance analysis;
- Main power supply inspection;
- Cleaning of control components;
- Checking all system components (keypads, readers, doors, locks) and recording of any variations
